

Certificate of production

BIOARPIL

Protection and regeneration

The BIOARPIL is manufactured in a company with comply following GMP "**Good manufacturing practice**"

- Manufacturing processes are clearly defined and controlled. All critical processes are validated to ensure consistency and compliance with specifications.
- Manufacturing processes are controlled, and any changes to the process are evaluated. Changes that have an impact on the quality of the cosmetics are validated as necessary.
- Instructions and procedures are written in clear and unambiguous language. (Good Documentation Practices)
- Operators are trained to carry out and document procedures.
- Records are made, manually or by instruments, during the production process that demonstrate that all the steps required by the defined procedures and instructions were in fact taken and that the quantity and quality of the cosmetics was as expected. Deviations are investigated and documented.
- Records of the production process (including distribution) that enable the complete history of a batch to be traced are retained in a comprehensible and accessible form.
- The distribution of the cosmetics minimizes any risk to their quality.
- A system is available for recalling any batch of cosmetics from sale or supply.
- Complaints about marketed cosmetics are examined, the causes of quality defects are investigated, and appropriate measures are taken with respect to the defective cosmetics and to prevent recurrence.
